Welcome friends to AutoCAD student today in this post i will be talking about Autocad free version, and download and install easily. First, if you are a student or beginner, so don't worry Auto-desk offers free cost software Just in 4 steps you can download and install1- registration2- download3- install 4-activatelet's talk about its limitation: it's just a student version With this help we can't earn money means after making a project in it you want to earn money with this project it can't be possible. Because the student version always leaves a watermark for educational use only on all plots This watermark will be saved with the file You will try to remove the file or the software may have collapsed. So please don't try to do it. If you want to earn money So please purchase this software, but you can only use this software for learning purpose.1- registrationFor registration follow this link or search for autdesk studentsselect your countrySelect studentThen the following box select date of birthAnd then you must mention here personal information would be name, email ID, password And then click on create accountNext open your email account and click check email and doneAnd now select the name of your college or university. And what course do you do, select it in the next box, then in the next box select the start year and pass year.2- downloadNow see we can download any Autodesk software from here.let see, I want to download Autocad 2019 from here Select autocad version, operating system, and your language To see Product Key and serial number will be generated. Which can be noted from here, otherwise you can get it from your gmail account. An installation application will be downloaded here. By which the help software will be downloaded automatically. But I do not like this method because if the download fails or crash for any reason. So my data and both time can be wasted so I download here manually3-installNow extract the file, simply install it, You can go there and download it.4-activatedNow for activation If you don't have the serial number, you can use the 30-day trial. But we have the serial number Then we select and enter the serial number and product keySee also Student Autodesk also offers, able to download all autodesk software (3Ds MAX, REVIT, Maya ...) Free Autodesk software and/or cloud-based services are subject to acceptance and compliance with the terms of use or other applicable terms that accompany such cloud-based software or services. Cloud-based software and services that are subject to an educational license may be used exclusively for educational purposes and will not be used for commercial, professional or other for-profit purposes. Students and educators are eligible for an individual educational licence if they are enrolled or employed at a qualified educational institution that has been accredited by an approved government agency and has the primary purpose of teaching enrolled students. learn more. Qualified educational institutions may access free educational licences for the purpose of learning, teaching, training, research and development which form part of the training functions performed by the educational institution. learn more. Autodesk provides eligible students, educators and educational institutions with free access* to the same design software used by engineers, designers and digital artists. Early access to these professional tools helps students start mastering skills and understand the necessary workflows in the workplace. Software available Many Autodesk titles are available through the Education program, including previous versions. Check the Education community website for a list of products. Some requires an educational network license that is available upon request and approval by Autodesk. See Available for eligible educational institutions, upon request, for a list of products. Return to the top Who qualifies? Free access is available for: Eligible students and educators must study or be employed educational institution and may use software accessed through the Education Community on a personal device for purposes directly related to learning, teaching, training, research or development. Qualified educational institutions that require multi-user licensing for classroom or laboratory deployments to be used as part of their instructions for students. A qualified educational institution is an educational institution that has been accredited by an authorized government agency within its applicable local, state, provincial, federal, or national government and has the primary purpose of teaching its enrolled students. This includes middle schools, high schools and higher education institutions. Returning to the duration of the top license As of March 25, 2020, the term for educational licenses for multiple users and networks available through the Autodesk Education community is 1 year. From 4 August 2020, 1-year single-user educational licences available through the Educational Community shall be replaced by a year-on-year educational plan which shall provide eligible students and educators with free educational access to use Autodesk products and services available through the Education Community. *Eligible students and educators have free access to a renewable 1-year education plan. Returning to maximum usage restrictions Students and educators Free access to software is only available for learning, teaching and research and development. It may not be used for commercial, professional or other for-profit purposes. Competitors and mentors for Design Contests sponsored by Autodesk Free access to software can be used to design, develop, create and send competition entries in design competitions sponsored by Autodesk. Educational Institutions Free software may be used by educational institutions only for purposes directly related to learning, teaching, training, research and development that form part of the training functions performed by the qualified institution. Software that is licensed through the Autodesk Education Community can only be installed on the computers or devices of the educational institution, would be in a computer lab. For some software, students may need to have an Autodesk ID to access the software downloaded from the educational institution's computers. Example: When educational institutions wish to make EAGLE software available to students in the classroom or laboratory, the educational institution must go to the Education Community to license and download the software from the educational institution's computers. The educational institution can then allow students and the faculty to access on the educational institution's computers using the autodesk ID. See to access Autodesk EAGLE for the use of education. Educational software may not be used for commercial, professional or any other for profit. Non-permitted uses under an educational licence include: Use of facilities: Design, construction and maintenance of a physical structures of the campus and infrastructure. Exception: An educational institution may continue to use those specific versions of the products for the use of the facilities if the use of the facilities was previously granted through a licensing agreement or a separate agreement. To purchase commercial licenses, please contact an Autodesk reseller. see Location of a Research Reseller: Research conducted by any commercial programs or entities operated by or affiliated with the educational institution for commercial purposes. Exception: Academic research carried out by students or teachers as part of the accredited educational programmes of the educational institution is considered to be an educational purpose and that the research can be published. Return to the top education terms and conditions In addition to the Standard Terms of Use that apply to all customers using the Autodesk website, your access to the Education Community is also subject to special education terms. For more information about the terms that complement the License & Services Agreement, see Educational Licenses – Additional Terms. Return to Top See Educational Licenses & Terms Cloud Services for Students & Educators Educational Institutions (*) Free Autodesk Software and/or Cloud-Based Services are subject to acceptance and compliance with the terms and conditions of the Software License Agreement or the terms of services that accompany such cloud-based software or services. Cloud-based software and services that are subject to an educational license may be used exclusively for educational purposes and will not be used for commercial, professional or other for-profit purposes.
